

Behaviour in the event of fire

Our fire prevention officer and as well her/his representative are in charge of the safety of our house. They are responsible for the supervision and adherence of the officially required fire precaution.

In case of smoke or fire in a room, leave the danger zone directly, call the fire brigade, warn your neighbours and move immediately to the collecting point in the front of the house (main entrance and lawn).

Same procedure during an evacuation alarm (continues tone)

Follow the green marked escape route (lighting only during power failure).

In case of fire or smoke development using the corridor or staircase and escape is not possible anymore,

Close the door

Turn on the lights

And shout out loud of the opened window waving to see you.

Emergency numbers: fire brigade 122 ambulance 144

Collection point: main entrance and lawn
